**Functions**
- High Quality Audio
- Answer and End
- Charge Port

**Pairing for the First Time**
1. Ensure that the Audio Receiver is fully charged and turned off.
2. Use your device to locate the Audio Receiver
3. Press and hold the power button for 2 seconds until the LED indicator single flashes red and blue rapidly.
4. Search or scan for Bluetooth devices from your smartphone, tablet, or computer.
5. Select “PAIRING” from the Bluetooth device list. If a code is required for pairing, enter “0000.”
6. Once paired, the LED indicator will flick blue rapidly. You are now ready to connect the Audio Receiver to a Bluetooth mobile device.

**Using the Audio Receiver with your home or car stereo system**
1. Locate the AUX Input port on your stereo system. Most can be found on the back or on the top of your stereo system. You may also find the AUX Input port near the front of some systems.
2. Insert the 3.5mm plug into the AUX Input port.
3. Your system will now play audio from the AUX Input port.
4. Adjust volume and play audio from your MP3 player, smartphone, or tablet computer.

**Charging the Audio Receiver**
1. Locate the included USB charging cable. Connect the micro USB tip of the USB charging cable to the charging port located on the side of the Audio Receiver.
2. Connect the large end of the USB charging cable to a power source. Your Audio Receiver is now charging. The LED indicator will light until fully charged.
3. When fully charged, the Audio Receiver will provide up to 12 hours of wireless audio streaming.

**NOTE:** Always use the Premier Mobile AC Adapter or USB charging cable to charge your device. Using any other power source or charger may cause damage to your Audio Receiver.
