- Recharges by USB and runs for up to 10 hours on a charge

### Package Contents

1. Bluetooth® Audio Receiver
2. USB Charging Cable

---

### Charging the Audio Receiver:

1. Locate the included USB charging cable. Connect the micro USB tip of the USB charging cable to the charging port located on the side of the Audio Receiver.
2. Connect the large end of the USB charging cable to a powered USB port on your computer or USB car or wall charger. The LED indicator will glow red to indicate charging.
3. Allow 2-3 hours for a full charge. The LED indicator will turn off when fully charged.
4. Once charged, the Audio Receiver will provide up to 12 hours of wireless audio streaming.

### Pairing the Audio Receiver to your smartphone, tablet or computer:

1. First make sure that the Audio Receiver is fully charged and turned off. You will notice that the LED indicator is not glowing. If the LED indicator is glowing, press and hold the power button until it flashes red and turns off.
2. Press and hold the power button for 7 seconds until the LED indicator begin flashing red and blue rapidly.
3. Search or scan for Bluetooth devices from your smartphone, tablet or computer.
4. Select “PBTAUXR” from the Bluetooth device list. If a code or pin is require for pairing, just enter “0000”.
5. Once paired, the LED indicator will flash blue periodically. Now you are ready to connect the Audio Receiver to a sound system or a pair of headphones.

### Using the Audio Receiver with your home or car stereo system:

1. Locate the AUX line-in port on your speaker system. Most can be found on the back next to the indications “AUX” or “Line-in”. You may also find the AUX line-in port on the front of some systems.
2. Insert the 3.5mm plug into the AUX line-in port.
3. If your system requires it, switch the audio input settings to play from the AUX line-in port.
4. Adjust volume and play audio from your PAIRED smartphone, tablet or computer. You will hear the audio come through your sound system speakers. Sound can be regulated by both your audio device and sound system independently.

### Troubleshooting:

**I am having trouble pairing the Audio Receiver to my smartphone, tablet or computer:**

- Please make sure the Audio Receiver is in PAIRING MODE. You will notice that the LED indicator will rapidly flash blue and red when in PAIRING MODE. Please consult the section in this manual “Pairing the Audio Receiver to your smartphone, tablet or computer”.
- Please make sure the Audio Receiver is fully charged.
- If your device is asking for a “PIN” or a “CODE” please enter 0000.

**I left the Audio Receiver to charge, but the LED indicator is not glowing:**

- Please make sure you have connected the Audio Receiver to a powered USB port.
- The LED indicator will turn off once fully charged.

**There is not audio coming out my sound system, even though I have followed the steps in this manual very carefully:**

- Please make that the volume is at an audible level on both your Bluetooth audio device and on your sound system. Audio is independently controlled by each device. 
- Check your sound system setting to ensure that you have selected “AUX” or “Line-in” settings.
- Please check your audio device output settings. It should indicate that it is providing Bluetooth audio.

---

### Cautions:
